sdmay20-22: Real-time Re-Recommendation System for POI Visits
Week 1 Report
September 12 - September 12

Team Members
Dheepak Nalluri — *Report Manager*
John Smolinski — *Chief Engineer*
James Eenhuis — *Database Manager*
Andrew Peters — *Facilitator*
Geng Sun — *Test Engineer*

Summary of Progress this Report
As of the creation of this report, development on the project has begun. Our group will begin by researching various topics. Geng will be researching the Google Maps API that will be implemented into the mobile app. James is researching networking to allow for the mobile app to connect to the database(sending and receiving data). John will research machine learning for the Metalearning module. Andrew will research mobile app development for the end product of our project being on mobile. Dheepak will generate UML diagrams and documentation.

Pending Issues
None

Plans for Upcoming Reporting Period
Next reporting period will be after demonstrations of research and rough outlines of ideas for project.
